SPRING FRAMEWORK

Spring Course will help in understanding about Spring framework and how to build web applications, RESTful APIs using Spring, Spring MVC, Spring Boot, Thymeleaf, Spring JDBC etc. By the end of this course, students will understand all the below topics.

COURSE OFFER

1. Spring Boot Application
2. Database with Spring Boot
3. Basic RESTful API
4. Basic Security
5. JSON Web Token (JWT)
6. Final Project

20% Scholarship

Fee : ~~$ 300.0~~ $ 240.0

Duration : 80 hours

ENROLL

COURSE OUTLINE

GETTING START WITH SPRING FRAMEWORK

- Spring Framework Overview
- Spring Boot Overview
- Spring Boot Application with Gradle
- Project Structure
- Lab: Discussion

CORE TECHNOLOGIES

- The IoC Container
- Spring Bean
- Spring Bean Scope
- Spring Bean Configuration
- Spring Resources

SPRING BOOT WITH MVC PATTERN

- MVC Overview
- Spring Web MVC Overview
- Spring Web MVC Annotations
- Redirect Attributes
- Lab: Homework

THYMELEAF TEMPLATE ENGINE

- Template Engine Overview
- Thymeleaf Overview
- Text, Variable
- Available Object
- Standard Expression Syntax
- Contional
- Iteration
- Fragment
- Layouts

MVC WITH THYMELEAF

- RedirectView
- RedirectAttributes
- FlashAttributes
- Data Binding
- Form Validation
- Exception
- Controller Advice
- Internationalization
- Multipart
- Lab: Classwork

DATA ACCESS WITH MYBATIS FRAMEWORK

- MyBatis Overview
- Database Connection
- MyBatis Mapper
- Dynamic SQL

- Database Relationship
- Advanced MyBatis with transaction
- Lab: Homework

COMMON DEVELOPMENT TOOLS IN SPRING BOOT

- DevTools
- Lombok
- Configuration Properties
- Lab: Classwork

RESTFUL API WITH SPRING BOOT

- RESTful API Overview
- Declaration with @RestController
- Media Types
- Parameters / Headers
- @RequestBody
- Build First RESTful API
- API Documentation with OpenAPI
- DTO Role
- Request / Response Customization
- REST API Exception
- Lab: Assignment

SPRING SECURITY

- Spring Security Overview
- Authentication
- Authorization
- Role-based Authentication
- Basic Authentication
- JSON Web Token
- API Documentation with OpenAPI
- DTO Role
- Request / Response Customization
- REST API Exception
- Lab: Assignment

PROJECT PRACTICAL

- Expanse Managment System
- Using Lesson that learning so far
- Authorization
- WebClient
- AJAX
